Text Top Space	20
Text Left Space	20

- Module Class Suffix A suffix to be applied to the css class of the module (table.moduletable), this allows individual module styling;
- > SWFObject script Mode 1 will use a local copy. Mode 2 will use the file hosted by Google. Mode 3 will disable insertion but it will use the code;
- Debug Mode No (Recommended);
- Multiple Instances This parameter allow to load multiple instances of the same module on the same website.
 How It Works: Make a copy of this module. After that, in the new copy set this parameter to "Copy 1"! Same, for other instances, but set this parameter to "Copy 2, Copy 3".

GLOBAL SETTINGS:

- ➤ Global Width Set up the global stage width, the actual width of the flash animation;
