- **Module Class Suffix** - A suffix to be applied to the css class of the module (table.moduletable), this allows individual module styling;
- **SWFObject script** - **Mode 1** will use a local copy. **Mode 2** will use the file hosted by Google. **Mode 3** will disable insertion but it will use the code;
- **Debug Mode** - No (Recommended);
- **Multiple Instances** - This parameter allow to load multiple instances of the same module on the same website.  
**How It Works:** Make a copy of this module. After that, in the new copy set this parameter to "**Copy 1**"! Same, for other instances, but set this parameter to "Copy 2, Copy 3 ....".

### GLOBAL SETTINGS:

- **NewsTicker Width** - Set up the global stage width, the actual width of the flash animation;
- **NewsTicker Height** - Set up the global stage height, the actual height of the flash animation;
- **Bar Color 1** - Set the bar color number 1;
- **Bar Color 2** - Set the bar color number 2;
- Note:** We use this two colors for **Bar Gradient**;
- **Bar Gradient** - If is set to YES, bar will have gradient fill. If is set to NO, it will be filled with solid color defined by **Bar Color 1**;
- **Bar Line Thickness** - Set thickness of border lines;
- **Bar Line Color** - Set color of border lines.

### NEWS TEXT SETTINGS:

- **News Font** - Choose the font for news (Verdana, Arial and Times New Roman);
- **News Size** - Set the news font size;
- **News Color** - Set the news font color;
- **News Hover Color** - Set the news font hover color;
- **Headline Font** - Choose the font for headline (Verdana, Arial and Times New Roman);
- **Headline Size** - Set the news headline font size;
- **Headline Color** - Set the news headline font color;
- **News Space** - From here, you can set the space between two news;
- **News Speed** - From here, you can set the (news) text speed. You can set negative value if you want text to move in opposite direction (e.g. -2);
- **News X Trim** - You can use this feature to move news to left or right (positive or negative value);
- **News Y Trim** - You can use this feature to move news to up or down (positive or negative value).

The screenshot shows a settings interface with two sections. The first section, 'Bullet Settings', includes fields for Bullet Size (15), Bullet Color (0x760ce8), Bullet Type (Circle), Bullet X Trim (0), and Bullet Y Trim (0). The second section, 'News 1 Settings', includes a dropdown for Enable News (Yes), a text field for URL Link (http://www.magicpoint.org), radio buttons for Link Target (New Window selected, Same Window), a text field for Headline Text (Magic Point), and a text area for News Text (Thanks for buying our product!).

### BULLET SETTINGS:

- **Bullet Size** - Use this to set size of bullets that separate news;
- **Bullet Color** - Set color of bullets;
- **Bullet Type** - Choose bullets type (Square, Circle, Line and None);
- **Bullet X Trim** - You can use this feature to move bullets to left or right (positive or negative value);
- **Bullet Y Trim** - You can use this feature to move bullets to up or down (positive or negative value).

### NEWS SETTINGS:

- **Enable News** - Choose if you want to enable or disable a specific news;
