

This is an amazing video player that supports fullscreen and is resizable. You have all the features a general player needs with advanced programming, nice user interface and a great deal of options that make it very flexible. Contains two skins to fit any site, a black one and a white one and supports an initial preview image that can be used to preview the video.

The player is very easy to set up and include in your projects!

## Features:

- You can choose the initial volume;
- You have two available skins (black and white);
- You can hide info and full screen buttons (see demo 3);
- You can select between original video size, zoom to fit, stretch to fit;
- You can set the video buffer size;
- You can set the player to start when the page is loaded;
- You can change the font size and color for title and description;
- Support special characters(âùæçéèêëîïôœûüÜÛÙŒÔïÎËÊÈÉÇÆÄÂÀ);
- It can play FLVs and MOV, MP4, M4A, MP4V, 3GP, 3G2 if they contain H.264 video and/or HE-AAC encoded audio (basically whatever the Flash Player can work with);
- Quick setup and customization.

## Note:

- The video file is not included in the download package!
- 2. The toolbar cannot be hidden or disabled!

New Feature: From now you have possibility to load multiple instances of the same module on the same website!!

This module contains 1 (one) predefined movie clip, maximum 1.

**Troubleshooting:** For any assistance, please do not hesitate to contact our support team.

	.:

- Module Class Suffix A suffix to be applied to the css class of the module (table.moduletable), this allows individual module styling;
- > SWFObject script Mode 1 will use a local copy. Mode 2 will use the file hosted by Google. Mode 3 will disable insertion but it will use the code;
- Multiple Instances This parameter allow to load multiple instances of the same module on the same website.
  How It Works: Make a copy of this module. After that, in the new copy set this parameter to "Copy 1"! Same, for other instances, but set this parameter to "Copy 2, Copy 3 ....".

## **GLOBAL SETTINGS:**

- ➤ Global Width Set up the global stage width, the actual width of the flash animation;

  Note: The minimum width supported by video player is 280px!
- ➤ Global Height Set up the global stage height, the actual height of the flash animation;
- Height Correction For the player to be displayed correctly you must set this parameter with **25px** less (!!! <u>IMPORTANT</u> !!!) than the Global Height, otherwise the toolbar will not appear!

Example: If you set Global Height to 380px, you must set Height Correction parameter to 355px (25px less)!

- Choose Skin Sets the player skin; can be set to black or white;
- Fullscreen Button Can be set to on/off (show/hide fullscreen button);
- ➤ Info Button Can be set to on/off (show/hide info text button);
- Play on Load Can be set to on/off (play/don't play video when player opens);
- > Start Buffer Can be set to on/off (start/don't start loading the video when player opens);
- > Initial Volume Choose the initial volume when starting the player;

- > Buffer Size Number of second needed for buffer to be full before the video start;
- Video Stretch Can be set to original size/zoom to fit/stretch to fit;

Original Size - video width and height is set to original video width and height, no modifications.

**Zoom to Fit** - the video is scaled up (or down) to best fit the player area – until it touches the first margin while maintaining it's aspect ratio. Depending on the video and screen ratios there will be black bars on top/bottom or left/right.

Stretch to Fit - the video will be scaled up (or down) to perfectly fit the player size, however usually the video ratio is altered.

- Start Photo Select or upload the picture used in the background before video start;
- Video Path Set up the path and name of the video file you want to use.
  Example: http://www.example.com/media/your movie name.mp4!

## **TEXT SETTINGS:**

- > Title Size Insert the font size for your title;
- Title Color Set the color for title;
- Title Text Specifies the title text that will be displayed in info area;
- Description Size Insert the font size for your description;
- Description Color Set the color for description;
- Description Text Specifies the description text that will be displayed in info area.
