## Compatibility with Joomla:

## Simple Image Rotator (version:1.0.0)

Module Class Suffix	<input type="text"/>
Slide Image Width (px)	<input type="text" value="650"/>
Slide Image Height (px)	<input type="text" value="400"/>
Image directory	<input type="text" value="images/banners"/> <input type="button" value="v"/>

### Styling

Background Color	<input type="text" value="#F5F5F5"/>
Border Color	<input type="text" value="#FFFFFF"/>
Border Size (px)	<input type="text" value="1"/>
Border Radius (px)	<input type="text" value="10"/>
Shadow Size (px)	<input type="text" value="22"/>
Shadow Color	<input type="text" value="#111"/>
Arrows Transparency	<input type="text" value="50%"/> <input type="button" value="v"/>

- **Module Class Suffix** - A suffix to be applied to the css class of the module (table.moduletable), this allows individual module styling.

### GLOBAL SETTINGS:

- **Slide Image Width (px)** - Set up the global width, the actual width of the module;
- **Slide Image Height (px)** - Set up the global height, the actual height of the module;
- **Image Directory** - Select a image directory.  
**How It Works:** Please upload your images (folder with images) on your server in Joomla **IMAGES** folder. After that, from the parameter **Image Directory** choose the desired folder!

### STYLING:

- **Background Color** - Choose the background color;
- **Border Color** - Choose the border color;
- **Border Size (px)** - Set the border size - **default:1**;
- **Border Radius (px)** - From here you can round the border - **default:10**;
- **Shadow Size (px)** - Set the shadow size - **default:22**;
- **Shadow Color** - Set the shadow color;
- **Arrows Transparency** - Set the transparency for the arrows.
