

Super Banner Slideshow is the ultimate Flash tool that helps you to display photo album and slideshows on your own website. With dozens of preset themes, you can easily make XML driven photo galleries for websites. Super Banner Slideshow is extremely user-friendly. Its friendly user interface enables you to create amazing flash slideshows out of your digital photos with quick and simple steps. No Flash knowledge or programming skills are required. Everybody can make a dynamic flash slideshow album in less than 5 minutes.

Features:

- There are more features, around 50 settings parameters available in the administration panel;
- Simple way to show images on your homepage with animated text;
- Support special characters (ø Ç Ý Û Ü Ú Û Ö Õ Ò Ó Œ Å À Á Â Ã Ä È É Ê Ë Ì Í Î Ñ);
- Two lines for each slide, set different Left Margin, Width and Color;
- Five types of animations are available (Fade, Move from Left, Right, Top and Bottom);
- Option to choose five different image transitions with auto transition;
- Click over the image will launch URL;
- Options for HORIZONTAL & VERTICAL thumbnails arrangement;
- Easy to position the Text & Thumbnails using align and spacing options;
- TRANSITION EFFECTS: Using auto transition option the images can be automatically animated by five different transitions (Simple Fade-in, Move, Diagonal fade, Radial fade, Circular Mask, Random);
- Option to choose any one of the transition for whole banner;
- Display short and long text with smooth animation.

New Feature: From now you have possibility to load multiple instances of the same module on the same website!!! This module contains 10 (ten) predefined slides, to add more (maximum 12) slides please contact support. For any assistance, please do not hesitate to contact our support team.

Compatibility with Joomla:

Super Banner Slideshow (version:2.0.5)

SUPER BANNER SLIDESHOW

Module Class Suffix	<input type="text"/>
SWFObject script	<input checked="" type="radio"/> Mode 1 (Local) <input type="radio"/> Mode 2 (Google) <input type="radio"/> Mode 3 (Disable)
Debug Mode	<input type="text" value="No (Recommended)"/> ▾
Multiple Instances	<input type="text" value="Original"/> ▾

Global Settings

Global Width	<input type="text" value="590"/>
Global Height	<input type="text" value="300"/>
Global BG Color	<input type="text" value="000000"/>
Global BG Transparency	<input type="text" value="50"/>

Image Settings

Image Width	<input type="text" value="590"/>
Image Height	<input type="text" value="300"/>
Image Transition Type	<input type="text" value="Random"/> ▾
Images Resize	<input type="text" value="None"/> ▾
Image Align	<input type="text" value="Top Left"/> ▾
Random Image	<input type="radio"/> Yes <input checked="" type="radio"/> No
Auto Slideshow	<input checked="" type="radio"/> Yes <input type="radio"/> No

- **Module Class Suffix** - A suffix to be applied to the css class of the module (table.moduletable), this allows individual module styling;
- **SWFObject script** - Mode 1 will use a local copy. Mode 2 will use the file hosted by Google. Mode 3 will disable insertion but it will use the code.
- **Debug Mode** - No (Recommended);
- **Multiple Instances** - This parameter allow to load multiple instances of the same module on the same website.
How It Works: Make a copy of this module. After that, in the new copy set this parameter to "**Copy 1**"! Same, for other instances, but set this parameter to "Copy 2, Copy 3".

GLOBAL SETTINGS:

- **Global Width** - Set up the global stage width, the actual width of the flash animation;
- **Global Height** - Set up the global stage height, the actual height of the flash animation;
- **Stage BG Color** - Set up the stage background color;
- **Stage BG Transparency** - the background transparency, 0 means fully transparent, 100 means no transparency at all.

IMAGE SETTINGS:

- **Image Width** - Set up the image width. Default value is blank. Blank values take the global stage width value;
- **Image Height** - Set up the image height. Default value is blank. Blank values take the global stage height value;
- **Image Transition Type** - You can choose from 5 types of image transitions available 1. **Slide** 2. **Fade** 3. **Diagonal fade** 4. **Radial fade** 5. **Circular mask** 6. **Auto** (random transition);
- **Images Resize** - You can choose the type of image resize 1. **Fit to area** (resize the image to fit the **Image width & Image height**) 2. **Fit** (resize the image to cover over **Image width & Image height**) 3. **none** (display without resize);
- **Image Align** - Set up the image alignment;
- **Random Image** - Display the images in random order;
- **Auto Slideshow** - Choose if you want the slideshow to autoplay or if you want to navigate thru slides using the buttons.
